SUMMARY

Computer Science (AI & ML) student who builds end-to-end systems — fine-tuned PyTorch classifiers, deployed FastAPI backends, and production PWAs with real users. Shipped two projects in agritech and one in deepfake detection, working across full-stack development, applied machine learning, and real-time systems architecture.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science (AI & ML)
GPA: 8.71/10.0

Bhopal, MP
2023 – 2027

TECHNICAL SKILLS

Languages: Python, C++ , JavaScript, SQL

Frameworks & Libraries: FastAPI, Flask, React, Vite, PyTorch, Pandas, NumPy, Scikit-learn, LightGBM, TanStack Query, i18next

Databases: PostgreSQL, SQLite, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Alembic, Docker, Vercel, Render, WebSockets, REST APIs

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

PROJECTS

Krishi Khata — Digital Farm Ledger & Market Intelligence

[Website](#) | [GitHub](#) 2025 – 2026

FastAPI, React, Vite, PostgreSQL, Gemini AI, WebSockets

- Built a full-stack agritech PWA featuring a JIT price pipeline that caches 30-day commodity histories in PostgreSQL for sub-200ms lookups.
- Integrated Google Gemini for runtime bilingual AI advisory in Hindi/English, alongside full frontend localization via i18next.
- Architected a hardened WebSocket chat gateway with JWT authentication and SlowAPI rate limiting.

DeepGuard — Deepfake Face Detection System

2026

Python, PyTorch, EfficientNet-B4, OpenCV, MTCNN, Grad-CAM

- Fine-tuned EfficientNet-B4 on FaceForensics++ across multi-compression forgeries, integrating an MTCNN OpenCV face extraction pipeline to eliminate background noise.
- Handled class imbalance via weighted cross-entropy loss and stratified splits; evaluated model performance using AUC-ROC alongside accuracy.
- Applied Grad-CAM visualization to surface predictive facial regions, transforming model outputs into explainable forensic heatmaps.

HACKATHONS

ISOTHERM — Agentic AI Smart Building Optimization

[GitHub](#) 2026

Honeywell Campus Connect Hackathon | Python, Agentic AI, HVAC Control

- Built an agentic AI system to autonomously optimize HVAC thermal comfort in smart buildings.
- Implemented predictive occupancy modeling to minimize energy waste and operational costs.

GRID-9 — Stellar Hack: A Vibe-a-thon

[Website](#) | [GitHub](#) Jul 2026

Manipal University Jaipur | Real-time Deepfake Forensic Triage

- Built a real-time deepfake detection and forensic triage console for rapid video review.
- Implemented frame-by-frame anomaly heatmaps and audio desync analysis to isolate forgeries.

ACTIVITIES

Google Developer Groups on Campus — VIT Bhopal

2024 – Present

LeetCode: Solved 200+ problems across arrays, graphs, dynamic programming, and trees — [leetcode](#)

CERTIFICATIONS

[Applied Machine Learning in Python](#) — University of Michigan (Coursera)

2024

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

2025

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

2025
