SUMMARY

Third-year Computer Science (AI & ML) student with hands-on experience in backend development, machine learning, and full-stack web applications. Recently led the ML and backend engineering for a six-person agriculture analytics project, building a LightGBM yield prediction pipeline trained on real district-level data. Looking for an internship where I can work on real problems in Python, ML, or backend systems.

EDUCATION

Vellore Institute of Technology <i>Bachelor of Technology in Computer Science (AI & ML)</i> GPA: 8.65/10.0	Bhopal, MP 2023 – 2027
--	---------------------------

TECHNICAL SKILLS

Languages: Python, C++, JavaScript (ES6+), SQL
Frameworks & Libraries: Flask, React, Vite, Pandas, NumPy, Scikit-learn, LightGBM, SQLAlchemy, Matplotlib, Tkinter, BeautifulSoup, Selenium, Chart.js
Databases: SQLite, MySQL
Developer Tools: Git, GitHub, VS Code, Postman
Areas of Interest: Backend Development, Machine Learning, REST APIs, Full-Stack Web Development

PROJECTS

AgroSense – AI-Powered Farm Analytics Platform <i>Python, Flask, React, LightGBM, SQLite</i> - Architected a three-tier web platform (Flask REST API + React 19/Vite + SQLite) for crop monitoring, yield prediction, and farm analytics. - Built a LightGBM yield prediction pipeline with 17 engineered features, quantile regression for confidence intervals, and biological yield caps; trained on 62,848 real district-year observations. - Implemented backend modules for soil analysis, irrigation scheduling (FAO Penman-Monteith), crop health scoring, pest risk detection, and financial ROI forecasting across 20 crop types. - Fixed an irrigated-crop underprediction bug through irrigation-aware feature engineering (<code>effective_water_rate</code>, <code>irrigation_idx</code>, <code>n_adequacy</code>).	2026
Spotify Music Manager <i>Python, Flask, Spotify Web API</i> - Built a web application to manage user playlists and analyze listening habits by integrating with the Spotify Web API. - Implemented OAuth 2.0 for secure user authentication and authorization.	2024
Stock Tracking News Alert <i>Python, REST APIs, Flask</i> - Developed a backend service that fetches real-time stock data and relevant news using third-party financial APIs. - Engineered a notification system to alert users via email or SMS when a stock's price changes beyond a pre-defined threshold.	2024

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 AI Professional

LANGUAGES

English (Fluent), Hindi (Native)
