Summary

Computer Science undergraduate specializing in AI & ML with practical experience building production web systems and applied deep learning models. Focused on delivering low-latency backend architectures across media forensics, AgriTech, and enterprise tooling, prioritizing measurable evaluation, clean API design, and reliable software deployment.

Education

Vellore Institute of Technology *Bhopal, India*
*Bachelor of Technology in Computer Science (AI & ML) | GPA: **8.69**/10.0* *2023 – 2027*

Technical Skills

Languages: Python, C++, SQL
Machine Learning & CV: PyTorch, Scikit-learn, OpenCV, Deep Learning, Computer Vision, CNN, LSTM, LLMs, RAG
Frameworks & Web: FastAPI, Flask, React, Vite, Pandas, NumPy, TanStack Query, WebSockets
Databases & DevOps: PostgreSQL, SQLite, Docker, Git, GitHub, REST APIs, Vercel, Render

Experience

Intellinex Technology *Noida, Uttar Pradesh, India*
Software Engineer · Internship *Jun 2026 – Aug 2026*
- Architected a multi-tenant asset management platform featuring 3-tier RBAC, barcode intake, and role-scoped FastAPI endpoints with PostgreSQL inventory tracking, deployed via Docker.
- Integrated an asynchronous LLM classification step into the intake pipeline to automatically tag hardware category, location, and depreciation tier, eliminating manual tagging for incoming assets.

Rural Games *Bhopal, Madhya Pradesh, India*
Software Engineer · Internship *Sep 2026 – Present*
- Architected responsive gameplay HUDs with safe-area layouts and virtual joysticks targeting 60 fps.
- Built an event-driven touch interaction pipeline with sub-4ms input latency, integrating Unity UI Toolkit for cross-device viewport normalization and reliable state dispatch.

Projects

PixelShamer — AI Media Forensics & Deepfake Detection Platform Website | GitHub *Jan 2026 – Aug 2026*
ML & Backend Engineer | IIITH Internship Assessment | PyTorch, EfficientNet, Bi-LSTM, FastAPI, React, Docker
- Built a spatio-temporal video deepfake engine combining EfficientNet-B5 embeddings with a 2-layer Bi-LSTM and temporal self-attention, achieving **100% ROC-AUC** on Celeb-DF v2 video and **93.1% ROC-AUC** on static portraits.
- Remediated eyewear and smartphone ISP false-positive bias by decoupling 22 spectral metrics and preserving peripheral boundary seams, cutting misclassification on glasses-wearing subjects from **99.2% to <5%**.
- Deployed a containerized FastAPI + React workbench with peak-anomaly Grad-CAM heatmaps, millisecond video scrubbing, and an unsupervised convolutional autoencoder pipeline for parallel surface defect triage.

Krishi Khata — Digital Farm Ledger & Market Intelligence Website | GitHub *Aug 2025 – May 2026*
Full-Stack Developer | FastAPI, React, Vite, PostgreSQL, Gemini AI, WebSockets
- Delivered an AgriTech PWA with a 12-hour worker pipeline ingesting data.gov.in commodity metrics into PostgreSQL, paired with in-memory TTLCache to guarantee **sub-200ms** market lookups.
- Engineered a bilingual (Hindi/English) AI advisory layer on Google Gemini, building custom CropData and Translation caches to serve localized agronomic insights with zero redundant LLM API calls.
- Architected a WebSocket chat gateway with JWT authentication and enforced endpoint-specific SlowAPI rate limits (**5–20 req/min**) across Auth and AI inference routes to mitigate abuse.

Certifications

Applied Machine Learning in Python — University of Michigan (Coursera) *Dec 2024*
Oracle Cloud Infrastructure 2025 Certified Generative AI Professional *Mar 2025*
